Downloading

Please refer to the following link on the Exclaimer website:

<http://www.exclaimer.com/signature-manager-office-365-edition/download>

Installing

Download and run the 'Signature Manager Office 365 Edition 1.0.2' installation file 'setup.exe'. An MSI is available from support by contacting support@exclaimer.com.

Uninstalling

Uninstall can be achieved via the 'setup.exe' or MSI for the currently installed version of 'Signature Manager Outlook Edition 1.0.2' or via 'Programs and Features' in Windows 2008 R2, Windows 2012, Windows Vista, Windows 7 and Windows 8.

The configuration files are located in the following folder and will not be removed as part of the uninstall process:

Operating System	File Location
Windows Server 2003 x86 and x64 Windows Server 2003 R2 x86 and x64 Windows Small Business Server 2003 Windows XP x86 and x64	\\Documents and Settings\\All Users\\Application Data\\Exclaimer Ltd\\Signature Manager Office 365 Edition
Windows Server 2008 x86 and x64 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Small Business Server 2008 Windows Small Business Server 2011 Windows Vista x86 and x64 Windows 7 x86 and x64 Windows 8 x86 and x64	\\ProgramData\\Exclaimer Ltd\\Signature Manager Office 365 Edition

The uninstall process will not lose any of your configuration or settings. However as a backup precaution you may wish to export your configuration.

Export Steps

1. Open the Exclaimer Console
2. Select the 'Exclaimer' node
3. Open the 'Action' menu
4. Select 'Export Configuration...'
5. Select a location and filename for the export
6. Press Save

This will export all your settings including all your templates and licensing data.

Fixed Issues

- Application impersonation PowerShell script was not compatible with "Small Business Premium" Office 365 plan.
- Outlook Signature Update Agent MSI installation required elevation to run.
- Outlook Signature Update Agent incorrectly checked for new signatures once at runtime only in certain scenarios.
- Plain text signature file encoding was set to UTF-8 not UNICODE causing some characters to not be displayed correctly.
- Auto Discover functionality did not have a retry mechanism when timeouts occurred connecting to Office 365.
